Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 17, drawn to an adhesive, classified in class 528, subclass 370.
- II. Claims 16 and 18, drawn to a method of applying adhesive to antennas, classified in class 156, subclass 108.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the adhesive can be used on any article such as paper, wood, bandages etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Bruce Boggs on 1/16/03 to request an oral election to the above restriction requirement, but did not result in an election being made.
